## frontend developer

✉ akshaya.kini12@gmail.com ☎ +46 764411356 📍 Malmo, Sweden 🖱 <https://aksh-kin.netlify.app>

### PROFILE

---

A front-end developer with a Bachelor's degree in homeopathy (alternative medicine), passionate about building web applications, and who enjoys taking on new challenges and is always looking for ways to improve. I developed strong communication skills and a team player mindset while studying at university.

### EDUCATION

---

#### Frontend Developer Career Path

08/2022

Scrimba [🔗](#)

including skills in HTML, CSS, JavaScript, React, and Responsive Web Design

### CERTIFICATES

---

#### Responsive Web Design [🔗](#)

#### UI Design [🔗](#)

#### Skyscanner Front-End Software Engineering Virtual Experience Program on Forage - January 2023 [🔗](#)

Built a web application using React and Backpack library and gained experience working with tools which are used at Skyscanner.

### SKILLS

---

- |                      |                                |
|----------------------|--------------------------------|
| • HTML               | • CSS                          |
| • JavaScript         | • React                        |
| • Responsive layouts | • CSS-in-JS(Styled Components) |
| • SCSS/Sass          | • Jest(Unit testing)           |

### SOFT SKILLS

---

Communication	Team player
Critical thinking	Problem-solving

### PROJECTS

---

#### Movie&Tv Search with Unit Testing [🔗](#)

using React, React Router, Context API, SCSS, The TMDB API, Jest and React-Testing-Library

A movie and tv search app where users can search for either movie/tv and get results displayed on the screen and clicking the cards takes them to a new page that displays additional information. Pagination was implemented from scratch for this project. Added Unit Testing for components.

#### Quizzical [🔗](#)

a quiz app-using React and The Trivia DB API

This is a Scrimba solo project. Users can select the question category and difficulty level and then have to select an option and on clicking "check answers", a score will be displayed along with the correct option.

#### E-commerce site [🔗](#)

using React, React Router, CSS-in-JS(Styled Components), a REST API, Firebase

Users can navigate to different pages, add products to "favorites", increase/decrease quantity of product in cart. There is also an option to sign in/sign out(Used Firebase for authentication)

#### Game of Thrones rolodex with Unit Testing [🔗](#)

using React, CSS, The Thrones API, Jest and React-Testing-Library

Users can search for their favorite characters, view a random quote by one of the characters, and generate another quote by clicking the button. Added UnitTesting.

### **Color scheme generator**

*using HTML, CSS, vanilla JavaScript, CSS, The Color API*

This is a Scrimba solo project. Users can select their favorite color and get various schemes. The generated hex codes can also be copied to clipboard.

### **Looptsudios landing page**

*using HTML, CSS and JavaScript for the navigation bar*

Frontend mentor challenge to get it looking as close to the design as possible.
