SOFT SKILLS

Communication   Team player

Critical thinking   Problem-solving

PROJECTS

Movie&Tv Search with Unit Testing 🔗
using React, React Router, Context API, SCSS, The TMDB API, Jest and React-Testing-Library
A movie and tv search app where users can search for either movie/tv and get results displayed on the screen and clicking the cards takes them to a new page that displays additional information. Pagination was implemented from scratch for this project. Added Unit Testing for components.

E-commerce site- fullstack MERN app 🔗
using React, Redux, React Router, CSS-in-JS(Styled Components), a REST API built with Node.JS, Express, MongoDB
Initially, a frontend project, now converted to a fullstack application with authentication. Users can navigate different pages, add products to "favorites", and increase/decrease the number of products in the cart.

Game of Thrones rolodex with Unit Testing 🔗
using React, CSS, The Thrones API, Jest and React-Testing-Library
Users can search for their favorite characters, view a random quote by one of the characters, and generate another quote by clicking the button. Added Unit Testing.

Task Manager - fullstack MERN app 🔗
using React, Redux, Styled components, Node.js, Express, MongoDB, JWT, bcrypt.js
A Task Manager application with authentication that can be used to create/read/update/delete accounts and tasks.

Quizzical 🔗
a quiz app-using React and The Trivia DB API
This is a Scrimba solo project. Users can select the question category and difficulty level and then have to select an option and on clicking "check answers", a score will be displayed along with the correct option.

Color scheme generator 🔗
using HTML, CSS, vanilla JavaScript, CSS, The Color API
This is a Scrimba solo project. Users can select their favorite color and get various schemes. The generated hex codes can also be copied to clipboard.
